**batonroute**

Traceus will soon become part of **BatOnRoute**, a mobility solution that goes beyond the scope of school transport.

**BatOnRoute** allows us to guarantee the highest level of quality to the growing number of international clients, offering an agile and efficient platform (+3,500 daily routes) and added functionalities.

This transformation is transparent both for schools and for monitors and families.

There is no loss of functionality and both the login credentials and how to use the web platform and the apps will be maintained so as not to penalize our users.

Traceus and BatOnRoute will live together for a while. Apps will display a message indicating the new name when updating the application and once the app is updated, it will work on the new platform, without loss of information
